

Patrick Wah Sekey

Bhubaneswar, Odisha, India | +917684828860 | patrick.sekey.ps@gmail.com | github.com/PatrickSekey

Professional Summary

Computer Science and Engineering M.Tech Candidate at Siksha 'O' Anusandhan University. Experienced in AI/ML, Cybersecurity, Computer Vision, and Full-Stack Development. Passionate about applying advanced computing to solve real-world security and technology challenges.

Education

M.Tech Candidate, Computer Science & Engineering | Siksha 'O' Anusandhan University, Odisha, India

B.Tech, Computer Science & Systems Engineering | C.V. Raman Global University, Odisha, India | 2022–2026

B.Sc., Mathematics (Major), Economics (Minor) | University of Liberia, Monrovia, Liberia | 2016–2022

Completed coursework up to senior level prior to receiving scholarship to pursue Computer Science studies in India.

Cathedral Catholic High School | 2009-2016

Research Publication

Improving Military Object Detection under Noisy Conditions Using Spatial Denoising Pipeline and ResNet-50 Based Deep Features

IEEE Conference Publication | First Author | 2026

Proposed spatial denoising framework combined with ResNet-50 for military object recognition. Evaluated Gaussian, Median, BM3D, DnCNN, and Autoencoder-based denoising approaches. Published in IEEE Xplore <https://ieeexplore.ieee.org/document/11541943>

Research Experience

Camouflaged Object Detection in Low-Light condition (Ongoing)

Deep learning techniques for detecting camouflaged objects under illumination degradation and environmental noise for surveillance and defense applications.

Domain-Aware Intrusion Detection Systems for the Internet of Everything

Designed CNN-LSTM, XGBoost, Random Forest, Logistic Regression, and SVM models. Developed domain-specific solutions for Vehicular IoT, Industrial IoT, Medical IoT, and traditional networks. Built real-time Streamlit dashboard.

Technical Skills

AI/ML:	LLMs, Feature Engineering, Model Evaluation
Cybersecurity:	Intrusion Detection Systems, Anomaly Detection, Network Security, IoT Security
Computer Vision:	Object Detection, Image Processing, Low-Light Imaging, Camouflaged Object Detection
Programming:	Python, Java, JavaScript, C, C++, PHP
Web Development:	React.js, Node.js, Express.js, Java, Spring and SpringBoot, REST APIs, JWT Authentication, Tailwind CSS
Databases:	MySQL, MongoDB

Projects

Star47 Store – Full-Stack E-Commerce Platform

React | Node.js | Express | MongoDB | Stripe | github.com/PatrickSekey/star47-store

Complete e-commerce platform with Stripe payment integration, dynamic shipping calculation, automated email notifications, and admin dashboard.

Norgen Trade – Full-Stack E-Commerce Platform

React | Node.js | Express | MySQL | JWT | Tailwind CSS | [Frontend](#) / [Backend](#)

International product sourcing platform with JWT authentication, role-based access control, admin dashboard, deployed on Netlify and Railway.

RideWise – Ride-Sharing System

Java | OOP | Design Patterns <https://github.com/PatrickSekey/RideWise>

Ride-sharing platform with dynamic driver matching, fare calculation strategies, Strategy Pattern, SOLID Principles, and low-coupled architecture.

Leadership & Activities

President, Liberian Students Association, Odisha, India

Lead initiatives supporting Liberian students in Odisha. Coordinate academic, social, and cultural activities. Promote collaboration, mentorship, and community engagement.

Certifications

Google Cybersecurity Professional Certificate | Google / Coursera

AI-First Software Engineering | Airtribe (Ongoing)

Languages

English (Fluent)
